

Alto: 2026 Municipal Candidate Directory

[Preliminary – October 7, 2026]

Methodology

Purpose of This Directory

This directory is intended to provide voters with a neutral, non-partisan summary of responses submitted by municipal election candidates regarding the proposed ALTO high-speed rail project. Information is drawn directly from responses.

Candidate Participation

Participation in the questionnaire was voluntary. Candidates chose whether to submit a response and the extent to which they answered the questions provided. Candidates who did not submit a questionnaire response **are not included** in this directory. Some candidates did submit position statements or website/Facebook links to their platforms. These are **not included here** in the spirit of equitable treatment of responses.

Consult your candidates' social media for more information on their platforms, priorities, and concerns, OR find their contact details on your municipal website and reach out to them by phone or email to elicit their views.

Source Material

All information here is based on responses contained in questionnaires collected. Responses were submitted by candidates seeking election to municipal offices including mayor/ reeve, deputy mayor/ reeve, and councillor positions across participating municipalities.

Statement Classification

To assist voters in comparing responses, candidates' response classification is based on the answer that candidates selected for Question 1 of the questionnaire; "Which statement best reflects your current position on the proposed Alto project and its potential impacts on agriculture, the local environment, properties, and communities?".

Please note: this preliminary directory is summarizing the candidate answers to Question 1. Candidates' answers to the rest of the questionnaire and their *verbatim* written comments will be posted in full on our website soon.

Oppose - Candidates selected "I oppose the proposed project and support alternatives that would reduce or avoid unnecessary impacts/ Je m'oppose au projet proposé et soutiens les solutions alternatives qui permettraient de réduire ou d'éviter les impacts inutiles"

Support - Candidates selected “I support the proposed project./Je soutiens le projet proposé.”

Concerns, more info needed- Candidates selected “I have concerns but require additional information before taking a position./J'ai des inquiétudes, mais j'ai besoin d'informations supplémentaires avant de prendre position.”

Other - Candidates selected “Other / Please explain. Autre/Veuillez expliquer.”

Neutrality Statement

This directory does not endorse candidates, political parties, advocacy groups, or positions on the ALTO project. The objective is to provide voters with accessible information that allows them to compare candidate responses.

Limitations

Readers should be aware of several limitations:

- Participation was voluntary and not all candidates have yet had the chance to respond.
- **Responses will continue to be accepted until 5pm on October 19, 2026. A final directory with full responses will be shared on October 20, 2026.**
- Candidate positions may evolve after submission of the questionnaire.
- Responses reflect the information available to candidates at the time of submission.
- Statement categories summarize responses and do not capture nuance contained in a candidate's written comments. Readers are encouraged to consult the full candidate responses when available.

Citation Standard

All candidate information is derived from the questionnaire responses.

Disclaimer

This directory is an informational resource intended to share candidate responses with voters. Responsibility for the content of individual responses rests with the candidates who submitted them. Inclusion here does not imply endorsement, verification, or agreement with any candidate position. If any candidate or voter identifies any errors or omissions, please contact us: info@unitedagainstalto.ca

Authorship

The questionnaire campaign was prepared by the United Against Alto coalition whose membership includes community groups along the Alto corridors under study.
